

Navy Directives Notices and Change Transmittals

Presented By:

DNS-15

NOTICES

Notice and Change Transmittal Authorities

•SECNAVINST 5215.1D – Secretary Of The Navy Directives Policy

•OPNAVINST 5215.17 - Navy Directives Issuance System

Notice Definition

Notice:

- Is a directive that has a one-time or brief nature and has a self-canceling provision
- Has the same force and effect as an instruction
- Remains in effect for usually less than 6 months, but no more than 1 year

Any requirement for continuing action contained in a notice, such as submission of a report, use of a form, or following specified procedures, is considered to be cancelled when the notices is cancelled, unless the requirement is incorporated into another suitable document.

Notice Criteria

- Not falling within the scope of the instruction criteria (see chapter 2, subparagraph 3a of OPNAVINST 5215.17)
- Requests for comments, approval, or information
- Directions for routinely carrying out established operations such as matters pertaining to individual personnel actions or special shipments of material
- Informative announcement such as change of command, education or promotion opportunities, recreational activities, work improvement plans, suggestions for morale building, or changes in office locations or telephone numbers
- Issuance of short-term policies, forms, and reporting requirements

Formatting a Notice

Notices follow the same format as an instruction

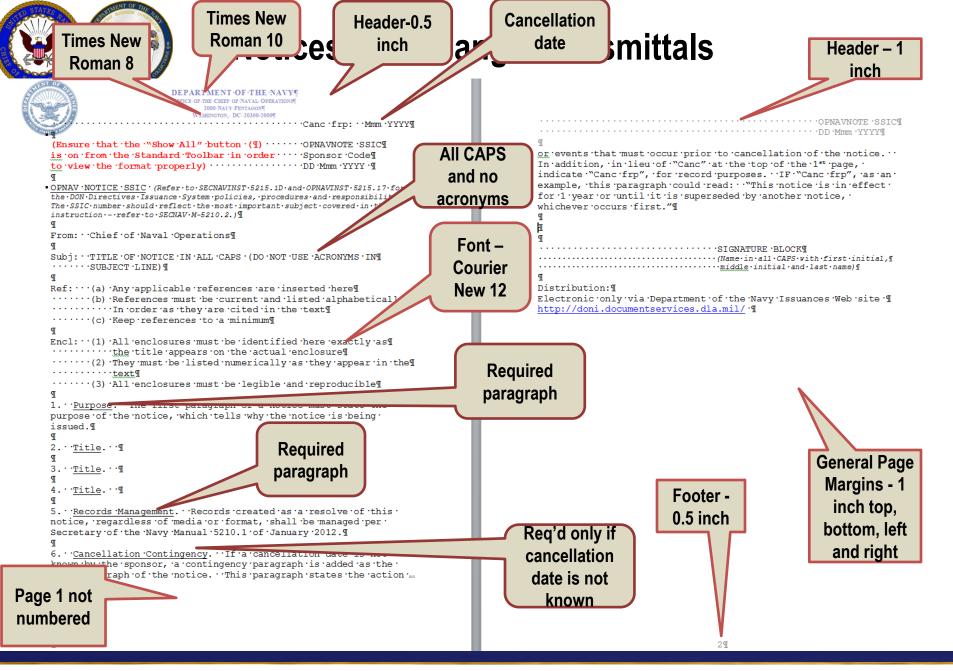

Identification :

- <u>Cancellation date</u> (in Mmm YYYY format) indicated in the upper right corner of the first page, immediately below the e-letterhead without spaces and two lines above the identification symbols. If the cancellation date is unknown and is for record purposes only, with a contingent provision, use "Canc frp". Otherwise, if cancellation date is known, use "Canc."
- <u>Identification symbols</u> Two lines below the cancellation date to include the short title SNDL abbreviation of the command followed immediately by "NOTE" (e.g., "OPNAVNOTE") and the applicable standard subject identification code (SSIC), per the SECNAV M-5210.2. The following line contains the sponsor/originator code followed by the date (in DD Mmm YYYY format) of the notice on the next line. Of the identification symbols, the longest line is flushed to the right margin with the remaining lines, including the cancellation date aligned left with the longest line.
- <u>Designation line</u> two lines below identification symbols. In all CAPS and underlined, the short title SNDL command abbreviation, the word "NOTICE" and the SSIC.

Formatting a Notice

- From: commander or commanding officer
- <u>Subject</u>: In all CAPS (do not use acronyms in the subject line). As with instructions, keep the subject brief, but concise. Let's than 10 words, if possible.
- References: Must be current and listed alphabetically in the order they are cited in the text
- Enclosures: Must be identified in the enclosure line exactly as the title appears on the actual enclosure.
 They must be listed numerically in the order as they are cited in the text
- <u>Purpose paragraph (required)</u>: The first paragraph of a notice and must state the purpose of the notice, which tells why the notice is being issued. If the sole purpose of a notice is to cancel another document(s), the cancellation statement may be made in the purpose paragraph.
- Records Management (required): This is a CNO requirement which will be reflected in the revised OPNAVINST 5215.17A

Notices Cancellation Contingency

- The date on which the notice is canceled is determined by the sponsor, and must be cited on the notice
- The date of the cancellation is the last day of the month indicated
- In some instances, the sponsor can not determine the exact date on which required action will be completed. In these instances, a cancellation contingency paragraph is added as the last paragraph of the notice and "Canc frp" is used vice "Canc."
- This paragraph states the action or events that must occur prior to cancellation of the notice
- Notices may expire prior to the cancellation date if the action or event detailed in the contingency cancellation paragraph is completed
- Forms/reports paragraph, if applicable, is the last paragraph in an instruction. It's the same for a notice **UNLESS** there is a cancellation contingency paragraph, which is then the last paragraph of the notice.

Notices and Change Transmittals

If forms/
reports,
paragraph is
prior to
cancellation
contingency
and after
records
management

If the cancellation date is not known the cancellation contingency is added as the last paragraph

Three lines after cancellation contingency paragraph

```
To revents that must occur prior to cancellation of the notice.

In addition, in lieu of "CANC" at the top of the lst page, indicate "CANC FRP", for record purposes. IF "CANC FRP", as an example, this paragraph could read: "This notice is in effect for l year or until it is superseded by another notice, whichever occurs first."

CHANGE TRANSMITTALS

Change Transmittal Definition and Criteria

- <u>Definition</u>: A change transmittal is the medium used to transmit changes to an instruction, or under extenuating circumstances, a notice. Each transmittal describes the nature of the changes it transmits, and gives directions for making them.
- <u>Criteria</u>: Transmits minor change(s) which affect less than 25 percent of the number of pages of the current basic directive.

Change Transmittals

- Change transmittals consist of a cover letter forwarding changed and/or additional pages to a
 directive as an enclosure.
- Change transmittals are numbered consecutively. That is, the first change transmittal to an
 instruction is change transmittal 1, the second 2, and so on. When an instruction is reissued
 as a revision, the numbering of change transmittal begins again with the number 1.
- The upgrading or downgrading of classified instructions by change transmittal is not authorized.

Formatting a Change Transmittal

The change transmittal follows the format of an instruction, with the following exceptions:

- <u>Identification Symbols</u>. The capital letters "CH" followed by a dash ("-") and the number of the change transmittal follow the first line of the identification symbols, e.g., OPNAVINST 5215.1D CH-1
- <u>Designation Line Instruction</u>. Contains the same designation line as the directive to be changed, followed by a space, "CHANGE TRANSMITTAL", a number, and underlined, e.g., <u>OPNAV INSTRUCTION 5215.1D CHANGE TRANSMITTAL 2</u>
- <u>Designation Line Notice</u>. Same as instruction, except that the date of issue must also be cited,
 e.g., <u>OPNAV NOTICE 5215 OF 6 JUN 2014 CHANGE TRANSMITTAL 1</u>
- Subject. Subject of directive being changed is always given and in all CAPS and no acronyms.

Required Paragraphs of Change Transmittal

• <u>Purpose paragraph</u>. The first paragraph of a change transmittal must state the purpose and the nature of the change transmittal, which tells why the change transmittal is being issued.

Example: "To transmit new pages 3 and 10, which revise . . . "

<u>Action paragraph</u>. The specific action(s) to be taken are identified in this paragraph. <u>Penand ink changes are no longer allowed.</u>

Example: "Remove page 10 of the basic instruction and insert enclosure (1) of this change transmittal."

Change Transmittals Page Change and Page Numbers

- One-Page Change. When a change is being made to only one page, the change transmittal number and its date are shown on the right margin of that changed page. The unchanged pages retain the same identification as when previously issued.
- Page numbers. Extra pages resulting from the inclusion of additional data in a change transmittal to a directive shall be numbered with the page number of the preceding page plus a small (lowercase) letter, as 10a, 10b, and 10c. A page(s) added after the last page of a directive shall be numbered with the next sequential number(s) following the last page.
